Subject Re: looking for a couple Pebble documents

I looked through the materials I have from 2005. There are lots of study plans but I have no results. The comment suggests that the results were presented in a presentation which may be the only way they conveyed it. I do not typically keep my notes from presentations. I don't recall them giving us any results in a printed format at the TWG meetings. Perhaps Phil B has something.

Dan, I am not aware of these documents. I did find minutes of a Fish Technical work group meeting in 2008 (attached). Phil North, Phil Byra and Doug Limpinsel were all there so I am ccing Phil N in case he has hand outs from the meeting in his files. If Phil had nothing I can call Dan Easton who replaced Ken Taylor and see if he can track them down. Who was the comment from? Maybe we can get the info from them.
